SCHMÖL ANTIFREEZE PRODUCTS

Extreme weather conditions and heavy continuous loads put machines, vehicles, and equipment to the test. With the high-performance SCHMÖL Antifreeze products, you are perfectly prepared: reliable frost protection, strong corrosion resistance, and maximum operational safety – even under the most demanding conditions.

February 2026

SCHMÖL ANTIFREEZE S12+ POWERFUL PROTECTION FOR MODERN COOLING SYSTEMS

SCHMÖL Antifreeze S12+ is a high-quality, ethylene glycol-based coolant designed to provide reliable protection against **frost, corrosion, and overheating**. Its **silicate-free technology** ensures an exceptionally long service life and offers optimal protection for sensitive metal surfaces such as aluminum.

The product meets the requirements of many leading automotive manufacturers and delivers outstanding stability and versatile performance—ideal for modern vehicles and stationary engines.

Your Benefits at a Glance:

- **Effective protection** against frost, overheating, and corrosion across a wide temperature range
- **Compatible** with numerous international specifications and OEM requirements
- **Gentle on all metals** used within the cooling system
- **Extended service intervals** thanks to high chemical stability
- **Silicate-free formulation** for reduced deposits and improved environmental compatibility

SCHMÖL ANTIFREEZE S11 RELIABLE PROTECTION FOR CONVENTIONAL COOLING SYSTEMS

SCHMÖL Antifreeze S11 is a high-quality, ethylene glycol-based coolant designed specifically for **older vehicle models** as well as **modern vehicles with conventional cooling systems**.

The combination of **silicates and proven corrosion inhibitors** provides highly reliable protection for all metals used in the cooling system — including aluminum, copper, and cast iron.

The product is compatible with a wide range of vehicles and meets the requirements of numerous automotive manufacturers.

Your Benefits at a Glance:

- **Frost protection down to -37 °C** (at a 1:1 mixture)
- **Reliable corrosion protection** for aluminum, copper, and cast-iron components
- **Protective film technology** prevents deposits and extends system life
- **Ideal for older cooling systems** and vehicles with conventional technology
- **Meets international standards** and manufacturer specifications
